Pattern Making • Downstream Operations

## Drum Liners

**Belgrade Polymer Products is a BS EN ISO 9001:2008 quality assured accredited company offering a comprehensive range of vacuum formed and welded liners for drums, kegs and pails.**

Suitable for metal or plastic containers, liners will provide -

- Packaging cost down
- Container multi-use
- Waste reduction
- Minimum production contamination
- Maximum product recovery
- Company environmental compliance

Liners are offered in a number of sizes to suit containers ranging from 10 litre to 225 litre open top or tight head configuration. Barrier materials are selected to best suit the products the liners have to contain. Typically these will be polypropylene, polyethylene or a barrier film for the more aggressive products. Liners can be supplied as multi-layer with anti-static properties if required.

Bespoke liners can also be supplied to fit ink wells, mixing vats and drip trays etc. Manufactured to form an exact fit to individual press or laminating machine wells or drip trays. Tough vacuum formed antistatic liners are supplied in natural Polypropylene or Low Density Polyethylene.

## Durable Lids for Industrial Containers

The Belgrade Polymer Products range of a durable vacuum formed lids could be your solution to rusting drums, unwanted water collection on drum tops, leaking Tri-Sure closures or dust particle contamination to products when stored in tight head and open top drums and pails.

### DRUM WEATHER LID X 1

A tight fitting lid that will not be dislodged in windy conditions. Three designs are available for 205 litre drums, tight head, open top and open top with the lid off. The lids will withstand multi-stacking.

### DRUM WEATHER LIDS X 4

A heavy duty lid designed to fit over 4 x 205 litre tight head or open top drums. A flange that allows the profile of the drums will reduce the possible lifting of the lids in high winds. Flexible straps can be supplied as an additional means of securing if required.

### DRUM FLEXIBLE CAP

A flexible elasticated clear polythene cap ideal for light weather and dust protection for 205 litre drums.

### PAIL LIDS

Designed to fit metal pails used for onsite handling such as product mixing and storage. Available in 305mm diameter as standard with other diameters on request. This user-friendly lid offers a tight seal, is anti-static and has locating points for multi-stacking. A finger tab assists removal of lid from the pail.
